## Computer Applications

# Why Experts' Institute stands out?

## Proven Excellence:

Many students score 100 marks in ICSE exams every year.

## State-of-the-Art Infrastructure:

Our classrooms and computer labs are equipped with high-performance 'Intel i5' machines, projectors/ interactive digital board & high speed internet

## One person per computer:

Each student is allotted individual computer, ensuring that they can work at their own pace and receive the guidance they need.

## Advanced code testing:

Compiler checks only for 'syntax errors'. However, our in-house developed automated testing system, integrated with the BlueJ, rigorously checks student-written programs and identifies any logical errors, ensuring the code is error-free.

## Supportive Environment:

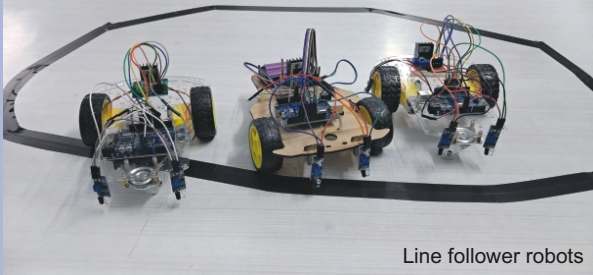

We foster a welcoming atmosphere where students can ask questions and clarify doubts freely, encouraging an open and collaborative learning experience.

## Real life success:

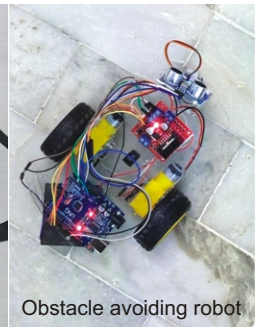

It's not just about passing exams; it's about inspiring for a bright future in tech. Our students develop a genuine love for coding.

A solid foundation in coding enables students to excel in advanced studies and secure excellent job placements. Many of our alumni are now contributing to some of the world's top tech companies like Google, Meta, IBM, and Amazon etc.

### Robots made by students

Line follower robots

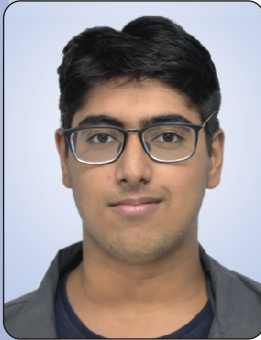

Obstacle avoiding robot
